Begin at the Gateway Library's home page: [http://www.gtc.edu/library](http://www.gtc.edu/library)

There is a directory of library staff, hours for each campus, library news, services provided, and tabs that will take you to more specific pages. Try these tabs: Resource Guides, Help & Tutorials, and For Faculty.

Resource Guides

This tab will let you select a library page with resources specifically for your program.

Choose a department (there are many more!) and you will go to that departmental home page.

- Accounting
- Administrative Professional & Office
- Business and Marketing
- Criminal Justice Resources
- Dental Assistant
- English Composition & Writing

Find Help & Tutorials

This tab has guides (print or interactive online) to help you use library resources.

- Searchpath is an interactive guide to library research.
- WISCAT lets you request an Interlibrary loan.

There are also guides to databases with full text journal articles, to collections of e-books (STAT!Ref), to government web sites, and to BlackBoard.

Learning Express offers career preparation materials, including resume templates, GED practice tests, skill building for English language learners, and preparation for professional license exams.

Citation Help offers guidance and examples that will help you write a research paper in APA or MLA format.
This tab offers you the opportunity to request a library instruction session in your classroom. See the services menus to choose among many possibilities, ranging from the evaluation of Internet sites to the selection of the best databases for your subject area.

You can also have input into our selection of new materials by using the “Request for Library Collection Addition” link. Give us feedback about library services and how we could assist you in serving our students by using the Gateway Library Survey.

Of course you can do your own search in the library catalog at any time by using the search box on each page:

Search: college teachers

Once you are in the catalog, click the “NEW SEARCH” tab to do a more complex search, combining terms and limiting by campus, date, or format.

In the catalog, each title will have information about which campus has it and whether it is currently available. If you would like it delivered to your campus, just ask a librarian for assistance.

Remember: You can contact library staff by phone or by email, through the “Help” box available on the library web pages:
